

Users create weak passwords frequently

Multiple users shares an account & password

Staff leaks account & password

App management and maintenance become complex and difficult

Servers and hardware token cost is high

SecurLogin solves all these challenges for you!

Strong Authentication

Reduce risks caused by weak password and the cost of maintenance & equipments

Cloud Services

Easy-used Cloud service and simple deployment

Unified Management

Unified platform for effective & central management

SecurLogin - Strong Authentication

SecurLogin offers real time Second Factor Authentication (2FA) service on the Cloud to strengthen enterprise user login process. There is no need for enterprises to purchase any equipment. SecurLogin client app is required for some SecurLogin supported authentication methods, so enterprise staff needs to download and install it to support desired authentication methods. i-Sprint's strong authentication solutions are deployed to over 200 banks, and it provides enterprise reliable and leading strong authentications.

Strong Authentication Methods

OTP via SMS or Email

Push messages via app built-in token

OTP generated by app built-in token

Scanning codes using app

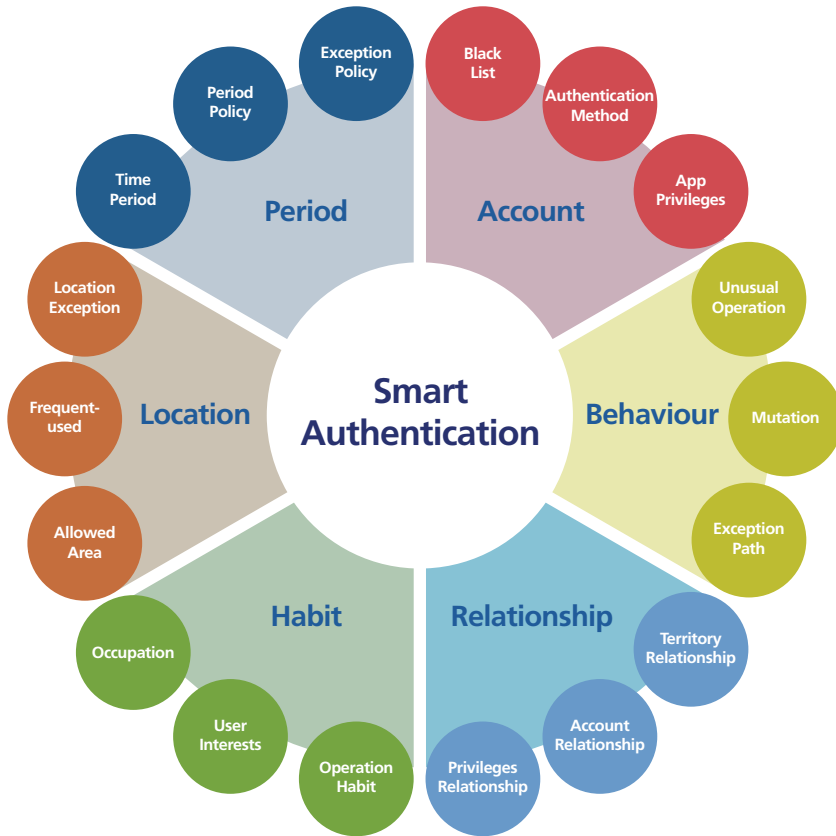

Telephone voice notification

Biometrics Authentications

- **Smart Authentication (Contextual Authentication):** Auto adjusts the authentication level according to multiple factors, e.g. user accounts, habits, locations

- **Combination Authentication:** To improve the security and conveniences of authentication by combining user action and biometrics features

Biometrics Features

Action Features

SecurLogin - Unified Management

SecurLogin contains powerful unified management platform which can support multiple authentication methods to provide comprehensive identity authentication solution for enterprise information mobilization.

Various Management Functions • Enterprise Self-control • Big Data Analysis

- Apply unified management and strong authentication for multiple app systems by creating apps in SecurLogin system.
- Data-backup secures enterprise data.
- Enterprise/ Individual user can manage the 2FA authentication methods of apps by accessing Cloud service portal.
